

Parental Permission Form

Your child's music teacher is participating in the Educational Service District 105's (ESD 105) ArtFusion Opus project. ESD 105 is providing regional music teachers and students with the opportunity to participate in an online music composition project designed to support the achievement of the Washington state music standards. Our goal is to provide regional composers the opportunity to review your child's music compositions through an innovative program of sharing and critiquing student musical compositions online. Your child's music teacher will be involved in this regional activity during the current school year.

The site to which your student compositions will be published is not a public site. It is only open to participating teachers and students along with a carefully selected roster of composer mentors. Central Washington University and Yakima Valley Community College staff and students are among those participating in the project and serving as mentors.

In order for your student's work to be included in the online mentoring program, we need your permission. We would also like permission to share your student's work in presentations and articles about the ArtFusion Opus project and possibly performed publicly. There is an additional signature line below that will give permission for sharing your student's work with the public.

Please contact me if you have questions or would like further information.

Aurelio Garcia,
Regional Arts Education Coordinator, ESD 105
